INSECTICIDE RESISTANCE WARNING

GROUP 3A INSECTICIDE

For insecticide resistance management, Barmac Delta Force Plus is a Group 3A insecticide. Some naturally occurring insect biotypes resistant to Barmac Delta Force Plus Insecticide may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Barmac Delta Force Plus or other Group 3A insecticides are used repeatedly. The effectiveness of Barmac Delta Force Plus on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Barmac Industries Pty Ltd accepts no liability for any losses that may result from the failure of Barmac Delta Force Plus to control resistant insects. For information about strategies for managing insecticide resistance contact your local supplier or Barmac Industries Pty Ltd.
